

### IntelliVIEW 20.02 Release and Alpine Showcase 2020

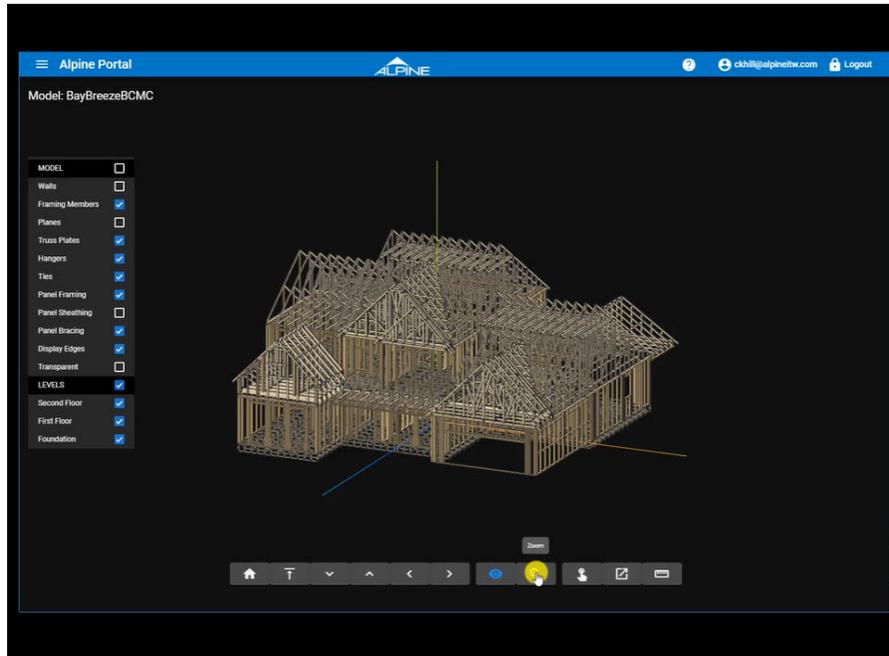

As we all wrap up 2020, we want to share our gratitude to our customers and all those who use and contribute to Alpine's training resource, <https://alpineacademytw.com>. We strive to provide relevant and helpful information to our customers and your input is always appreciated. We recently added new information regarding the **IntelliVIEW 20.02** release and the **Alpine Showcase 2020**.

**IntelliVIEW 20.02** contains some exciting additions to make your design work efficient and accurate. The 20.02 release enhances layout notes to easily add bearing legends, new gable features to use non-analyzed gable studs and stud alignment, and adding single overhangs on multi-ply trusses.

**IntelliVIEW 20.02** introduces the Alpine Portal, a unique communication tool that allows Component Manufacturers the ability to organize and share data with customers to reduce feedback time.

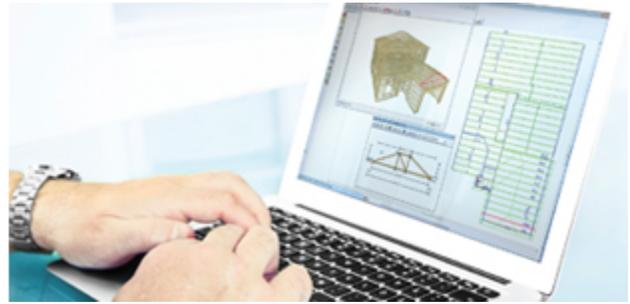

**IntelliVIEW 20.02** also provides more improvements to our iPanel program, rounding out the new features released in 19.02.

Alpine Academy has instructional videos showing the where and how of these new features, along with a link to the 20.02 User Guide.

The **Alpine Showcase 2020** brought us live presentations by our software and sales staff to highlight "What's New" to the software and equipment, along with tips on efficient usage. We have provided links to these recordings so that you can review the information presented.
