

New IntelliVIEW Guide Showcases Productivity-Enhancing Tools

The Alpine team works diligently to develop new and enhanced tools that enhance productivity in the IntelliVIEW software suite. With the recent launch of IntelliVIEW version 15.02, we have added a variety of innovative enhancements for your benefit.

Some of the key changes in this version include:

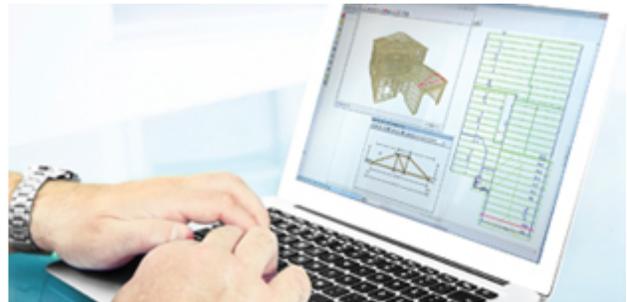

- Option to apply the non-concurrent live load across the entire chord
- New deflection check for exposed plaster and stucco wall coverings
- New option to double-bevel the low end (heel) of hip jacks
- Ability to lock the position of the toolbars has been added
- Move Openings has been improved to provide more options
- Output Processor is expanded to include more options for the Virtek saw
- The match webbing tool has been expanded to include the option to select a reference point
- Wind speed is determined by the state seal selected

Alpine's user guides are updated to reflect the changes in each major software version, as well as highlight the many new and improved features. Download IntelliVIEW Software User Guide Version 15.02 now to see these updates and bolster your productivity.
