

### Using the Verbose feature in iModel Job Audit

There is a great deal of information provided in the IntelliVIEW software, and deciding how you want to view that information can make it easier to understand processes and complete tasks. One particular instance that comes to mind is the Verbose feature in the iModel Job Audit.

Job Audit is found on the Job Designer toolbar in iModel.

Job Audit is a great resource to verify that all trusses have been engineered, they are properly labeled and the truss count is matching in both the layout and database, as well as all communications to the database are operating properly.

Job Audit provides a summary at the top of the window, and then lists the status of every truss in the job. If you have a large job, it can be difficult to sort through the list to find which trusses have issues.

```

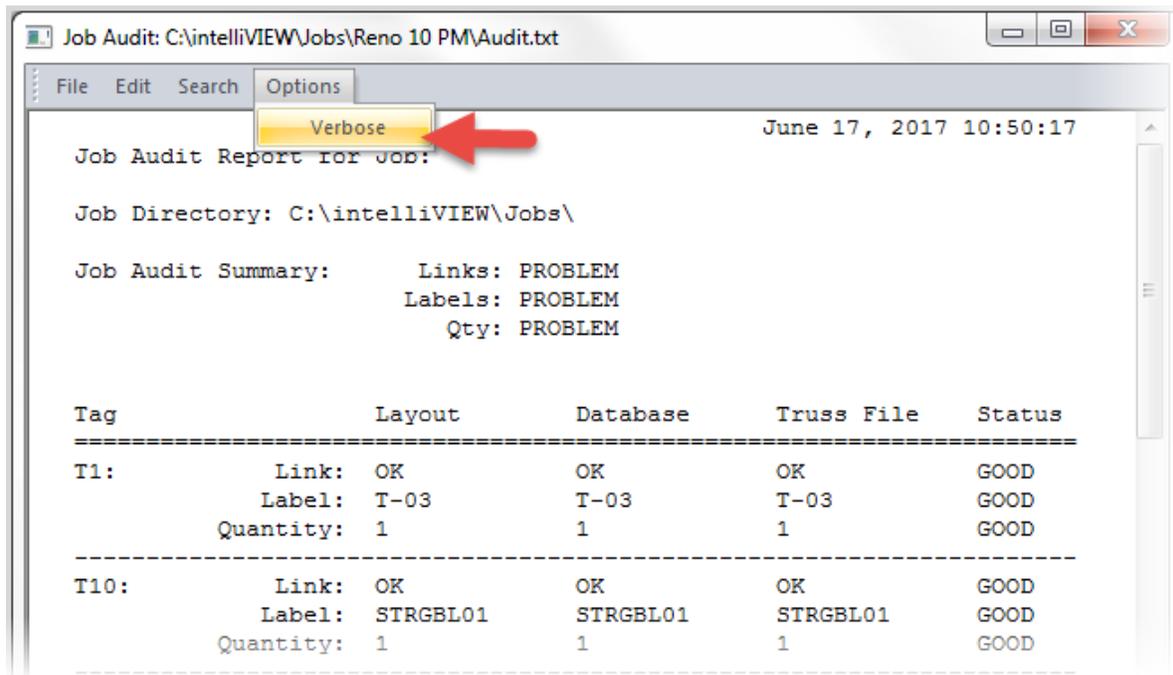

Job Audit: C:\intelliVIEW\Jobs\Reno 10 PM\Audit.txt
File Edit Search Options
June 20, 2017 10:54:20
Job Audit Report for Job: Reno 10 PM
Job Directory: C:\intelliVIEW\Jobs\Reno 10 PM\
Job Audit Summary:      Links: PROBLEM
                      Labels: PROBLEM
                      Qty: PROBLEM

Tag          Layout      Database      Truss File      Status
-----
T1:          Link: OK      OK            OK              GOOD
           Label: T-03      T-03         T-03           GOOD
           Quantity: 1      1            1              GOOD
-----
T10:         Link: OK      OK            OK              GOOD
           Label: STRGBL01  STRGBL01     STRGBL01       GOOD
           Quantity: 1      1            1              GOOD
-----
T11:         Link: OK      OK            OK              GOOD
           Label: M05       M05          M05            GOOD
           Quantity: 2      2            2              GOOD
-----
T12:         Link: OK      OK            OK              GOOD
           Label: T-06      T-06         T-06           GOOD
           Quantity: 3      3            3              GOOD
-----
T13:         Link: OK      OK            OK              GOOD
           Label: TG-02     TG-02        TG-02          GOOD
           Quantity: 1      1            1              GOOD
-----
T14:         Link: OK      OK            OK              GOOD
           Label: T-04      T-04         T-04           GOOD
           Quantity: 1      1            1              GOOD
-----

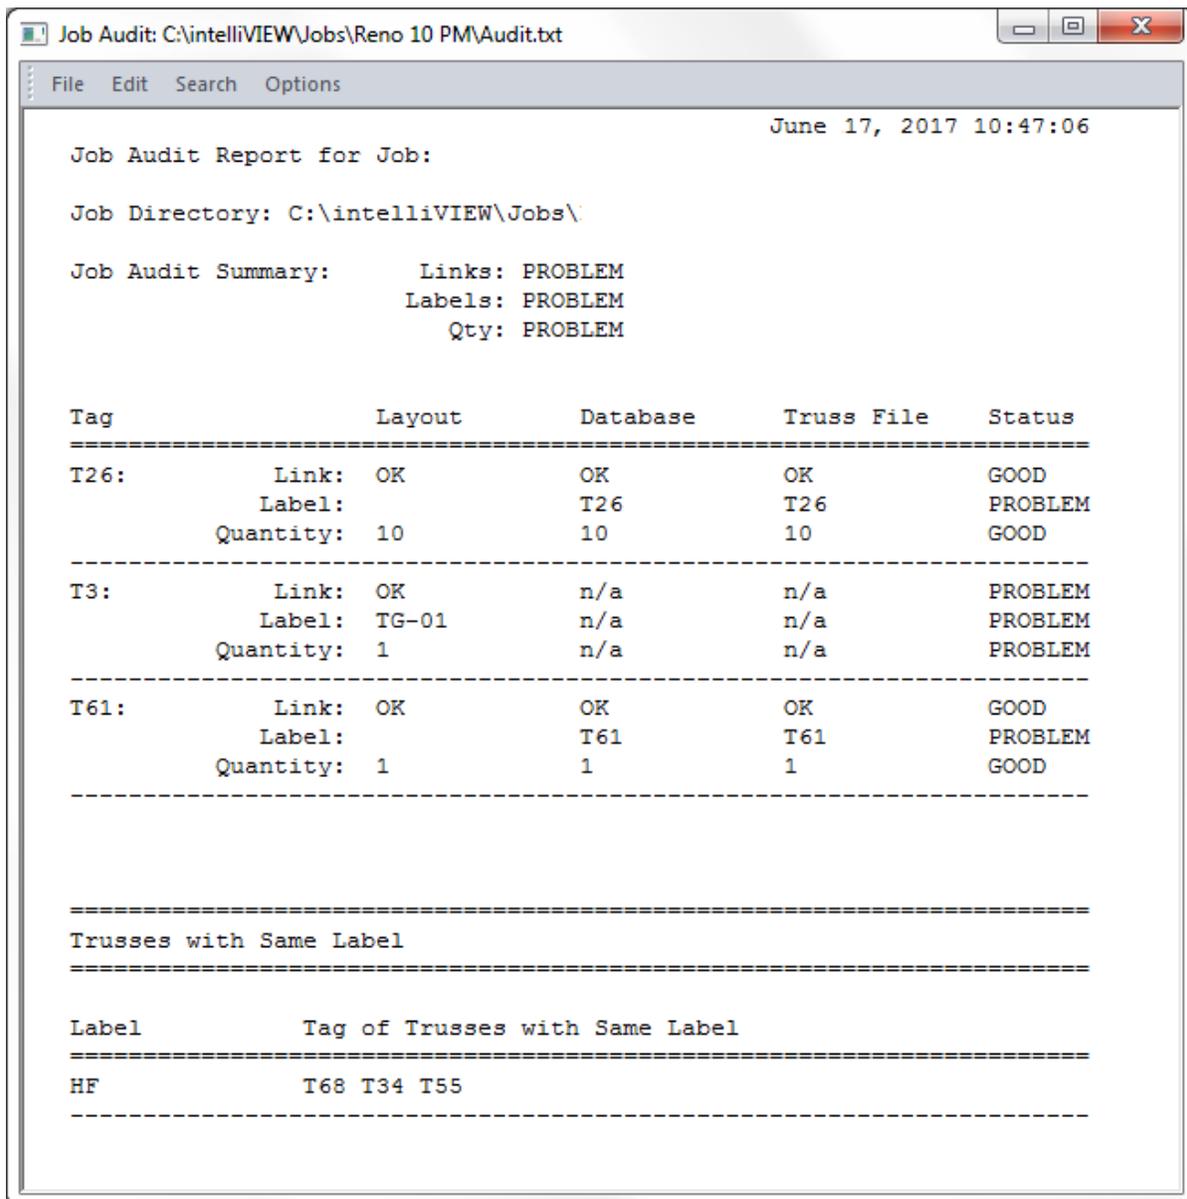

```

The Verbose feature enables us to limit the list to only those trusses that need attention, and omits all the trusses that do not present any issues in the Job Audit.

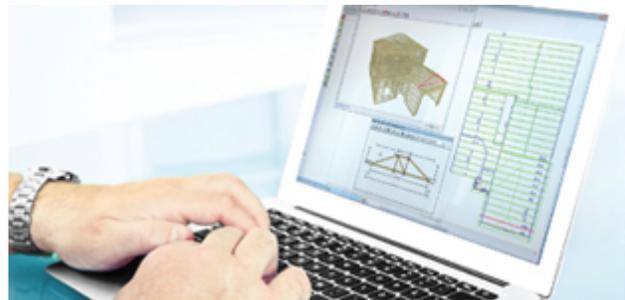

You can turn Verbose on and off by selecting the Options drop down menu and clicking the Verbose feature.

When the Verbose feature is turned off, you will see a condensed list containing only the trusses that need additional attention.

The Verbose feature makes it easier for Designers to view only the information they need to see in the Job Audit window.
